

Safe-Vu

- the range of flexible, hygienic protective screens

Fin

Fin uses cutting-edge AluGrip6 technology – a range of supportive feet and connective brackets that securely lock laser-cut panels of 6mm acrylic together. AluGrip6 systems offer unparalleled flexibility and are ideal for use in reception areas, retail spaces, commercial offices, cafes and more.

Float

Float utilises a range of specially-developed aluminium profiles to create a vast array of easy-to-assemble screen systems that are structurally robust whilst remaining elegant and visually inconspicuous.

Free

Free systems are built using strong, aluminium-framed screens and are available in a range of options – static, mobile and portable. All Free systems are highly-stable yet stylish, making them idea for use in offices, large commercial spaces and production environments.

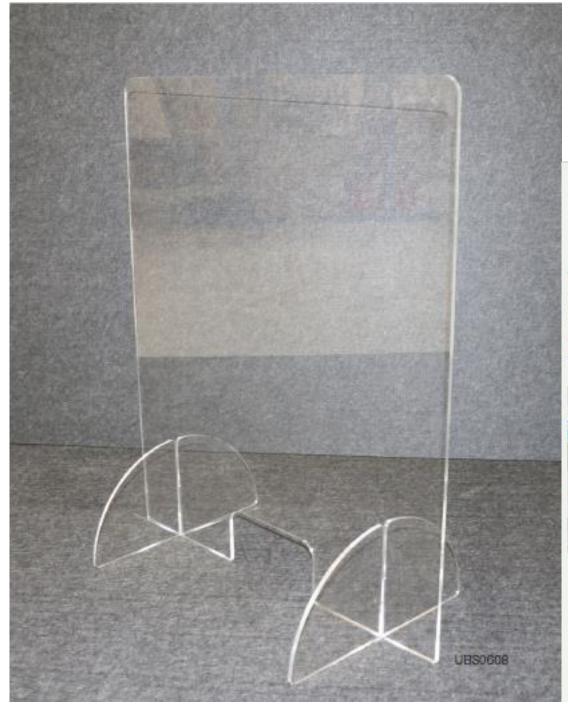

Free-standing Fin screens are built using 6mm panels of laser-cut acrylic to create aesthetically discrete, precise solutions.

Featuring laser-cut slots in the acrylic panels and corresponding slots in the acrylic feet, Fin screen systems are straightforward to assemble and don't require the need for specific training or tools.

Cashier Hygiene Screens

Transparent panel to create protection against coughs and sneezes. Simple and universally usable design suits a variety of environments, such as pharmacies, health surgeries, receptions, and many more. It has optional document slot and optional speaking holes. Supplied flat-pack for easy transportation.

Fin - Accessories

- Fin systems are available with optional base plates to offer additional stability and support. Base plates
 include non-slip rubber pads and can be supplied with screws for fixing screens directly to a surface.
- 90° corner brackets can be used in conjunction with Fin base plates to enable the creation of a wide variety of bespoke screen arrangements.
- Desk clamps engineered using AluGrip6 technology can be included to secure screen systems to work surfaces and offer an additional level of stability.

Float screen systems can be built using an array of different aluminium profiles and connectors, all of which have been designed by Unibox in-house. Each profile is fitted with a colour-matched end-cap to ensure panels are aligned precisely. Using our Float configurator, you can explore the range of different options that are available and select one to suit your specific requirements.

Float - Topper

Float Topper is engineered to integrate seamlessly with existing desk divider systems, extending them to a height which delivers effective protection against the transmission of viral illnesses and bacteria. Each laser-cut acrylic panel is supplied with adjustable steel U-brackets which securely clamp the Topper into position, regardless of the thickness of pre-existing dividers. To provide even more stability once installed, these fixing brackets operate in conjunction with cutting-edge AluGrip6 technology. The result? A visually sleek, practical system with unbeatable levels of flexibility that offers crucial protection in workspaces of all types.
