

This Moda structure for BP was installed in the car park of one of its garages in Hammersmith. We bought the venue to the attendees!

There were lots of health and safety elements to this project that the dedicated Project Manager had to work through in order for the completion to be a success. This proposal demonstrates the multi-use of our outdoor structures as they are not only used in an 'official' event.

Client Feedback

“Really happy with the structures, was perfect for the presentation and looked great with all the branding. We will definitely use again in the future.”
